

CUSTOMER INFORMATION BULLETIN

Rocket R57420 Uterine Sound

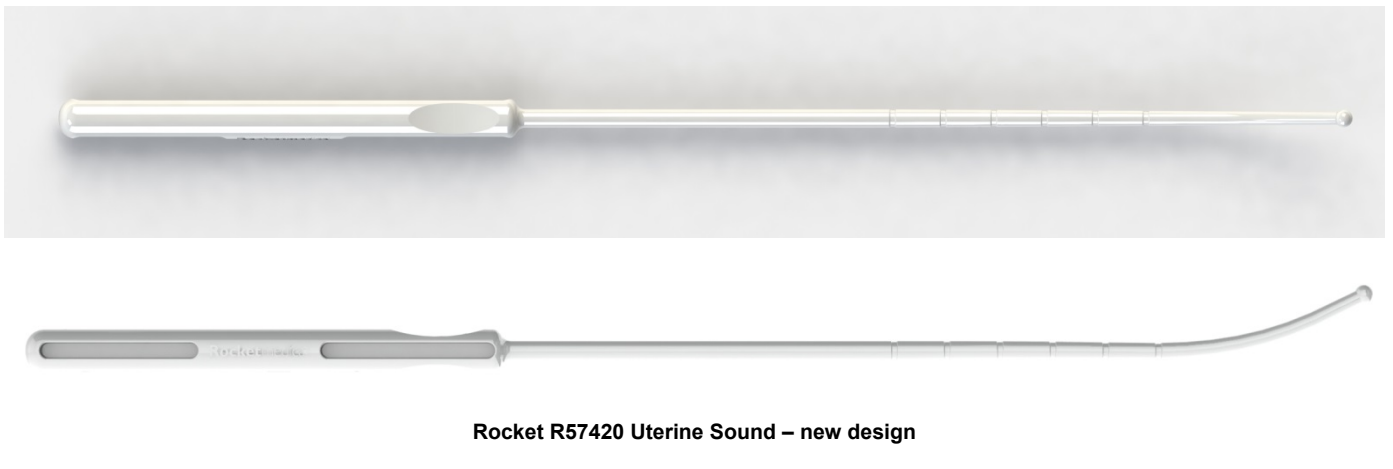

Dear Customer,

The mould tooling for our popular Rocket R57420 Uterine Sound has come to the end of useable life and has now been replaced.

We have taken this opportunity to re-design and improve upon the original design while retaining its best and familiar features.

Rocket R57420 Uterine Sound – old style

Rocket R57420 Uterine Sound – new design

Functionally the product remains unchanged, as does the order code, carton volume and pricing.

The new design will be introduced from **January 2014** onwards after stocks of the current version are used up.
