

Discontinuation of Stainless Steel Instruments

Dear Customer,

Rocket Medical plc. has supplied stainless steel instruments since its earliest foundation over 50 years ago.

However, as Rocket Medical has developed over that period, we have increasingly concentrated on single use devices which are all designed and manufactured in our growing factory in North East England.

Rocket Medical has taken the decision to discontinue supply of all reusable stainless steel instruments with effect from: 5th April 2016.

There are some exceptions. We have retained a small number of specific instruments to provide continued support for our own manufactured disposable products.

These items include:

- GIFT & IVF Instruments such as fimbrial grasping forceps
- Colposcopy Instruments such as cervical biopsy forceps
- Tonsillectomy Instruments (sterile)
- Rocket® KCH™ Catheter Introducer Sets (R29100)
- Rocket® Tough-Cut Scissors (R20420)

We would like to sincerely thank our many instrument customers, who over the years have given us their loyal support, enabling us to build the present company which now serves patients and healthcare professionals around the globe.

Customer Information Bulletins on all of our products can be found on our web site at:
www.rocketmedical.com

**If you have any questions, please contact the
Customer Services Team for assistance:**

**Tel: +44 191 419 6988. Fax: +44 419 6989. Email:
