

CUSTOMER INFORMATION BULLETIN

Rocket Amnioscope Product Code Updates

Dear Customer,

We are making improvements to our **Rocket FBS Amnioscope and Amnilume range** by introducing a new design.

The changes, which affect both amnioscope and light source modules, are being introduced from **July 2015** onwards and will affect all Rocket FBS Kit and amnioscope accessories.

As the components of the original and new styles are not interchangeable, there is the possibility of confusion between different product versions bearing the same product code.

After a review, it has been decided that the new versions will have new product codes to aid easier identification in distributor and end-user stock rooms.

The **new style** codes will have the suffix 'NS':

- **R57004-NS Rocket Amnilume™ Light Source**
- **R57016-NS - Rocket Amnioscope Set**
- **R57016-LUME-NS Rocket Amnioscope Set complete with Amnilume™**
- **R57016-PLUS-NS: Rocket Amnioscope (large size)**

IMPORTANT: Although the 'NS' style of Amnioscopes and Amnilumes™ are steadily being introduced into our FBS Kits, these product codes will **NOT** be changed as the kits are self contained units and end-users are already familiar with the correct code for their blood gas analysers

Certain versions of the original design (pictured right) will be phased out as stocks of components are used up.
