

CUSTOMER INFORMATION BULLETIN

Dear Customer,

As part of our programme of continuous improvement and in line with our environmental policies, we are making a minor change to the gauze swabs supplied in our Rocket[®] Fetal Blood Sampling, IPC[™] Indwelling Pleural Catheter Insertion sets and HSG Packs.

This change involves a minor deepening of the colour of swab.

In all other respects the size, function, absorbency, quality and x-ray detectable nature of the swabs are unchanged.

These new, darker colour swabs will be introduced into production by 1st March and will enter the supply chain soon after. There will be some variation between different versions of the same product type as stocks levels are replenished during their normal production cycles.

The product codes affected by this change are listed right.
