

Rocket[®] Amniocentesis Needles & Sets

Dear Customer,

Following a detailed review of the Medical Devices Regulations (EU 2017/745), we have reluctantly concluded that the increased level of regulatory support required cannot be justified in terms of the volume of units sold.

Despite their successful use for over 15 years, we must now discontinue manufacture with effect from **1st September 2019**.

This is not a decision we have taken lightly as we are fully aware that our customers have relied on these devices for many years. Fortunately there are a number of alternative suppliers available.

Unfortunately, with the discontinuation of these codes, Rocket Medical has now ceased supply of all amniocentesis needles and sets.

However, we continue to manufacture and supply our range of CVS Needles.

We sincerely apologise for the inconvenience this discontinuation may cause.

The following codes are affected:

Code	Description
R57035	Rocket Amniocentesis Exchange Set with 0.5m tube set, 10ml syringe, stopcock
R57036	Rocket Amniocentesis Set with 20G echo needle, 10cm extension set
