

- ◆ **MAXIMUM ILLUMINATION NOW COMES AS STANDARD:** To give you brighter, more reliable visualisation every kit contains the Rocket® Amnilume™ disposable light source
- ◆ **AVAILABLE IN TWO KIT VERSIONS:** Rocket® FBS Kits for handheld lactate monitors are available in both Standard and Sampling Wand versions
- ◆ **EASIER SAMPLE COLLECTION WITH THE SW:** The Rocket® Sampling Wand combines blade and capillary tube holders solving the problem of losing sight of the puncture wound when transferring between blade and tube holder. It is as easy to use a ball point pen.
- ◆ **CAPILLARY TUBE DISPENSERS:** Each kit contains 3 individual capillary tube dispensers. Simply remove the filled capillary tube (distal 1-2cm) from the Sampling Wand or capillary tube holder, insert into the adaptor on the tube dispenser bulb and lightly depress the bulb to deliver the blood sample directly to the test strip.

At Rocket Medical we know our customers are our greatest source of new ideas and product improvements.

So, our latest FBS Kits for handheld lactate monitors incorporate 3 dedicated capillary tube dispensers to make delivering the low volume sample typically used by strip based monitors, quicker, easier and safer.

#### CONTENTS:
