

Rocket Pro-Lux™ Sigmoidoscope

The Pro-Lux™ fully disposable sigmoidoscopy system is a ready to use device equipped with new features to make usage convenient, practical and effective. The system utilises the well respected Welch-Allyn rigid sigmoidoscope combined with these additional features:

- **READY TO USE:** self-contained battery powered light source with a ring of six high intensity white light LED's for maximum illumination.
- **COMPLETE SET** supplied with a disposable insufflation bulb and pilot balloon to provide a complete and economical single use system.
- **MAGNIFYING LENS** for clear and precise vision and easy application of biopsy instrumentation.
- **SAFETY:** Should local hospital policy require it, the battery pack is fully removable to permit safe, environmentally responsible disposal. Each carton is supplied with a battery storage tray to ensure safe separation of used battery cells in conformance with COUNCIL DIRECTIVE 2006/66/EC (as amended) with regards to EU battery disposal regulations.
