

Carbon Reduction Plan

Commitment to achieving Net Zero

Rocket Medical Plc is committed to achieving Net Zero emissions by 2050.

- We are committed to accelerating and supporting the NHS in its ambition to become the world's first Net Zero health service.
- We embrace the urgent responsibility to address the causes of climate change and enhance the resilience of our business and our supply chain to withstand climate change impacts happening now and in the future.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022 - This is the first-year reporting	
Additional Details relating to the Baseline Emissions calculations.	
[Instructions to Suppliers:	
Baseline Year Emissions: 2022	
EMMISSIONS	TOTAL (tCO₂e)
Scope 1	<ul style="list-style-type: none">• Gas consumption = 72.97 tCO₂e• Owned cars = 23.71 tCO₂e
Scope 2	<ul style="list-style-type: none">• Purchased Electricity = 260.98 tCO₂e
Scope 3 (include resources)	<ul style="list-style-type: none">• Business travel in employee owned vehicles= 9.79 tCO₂e
Total Emissions	367.45 tCO₂e

Current Emissions Reporting

Reporting Year: 2022	
EMMISSIONS	TOTAL (tCO ₂ e)
Scope 1	<ul style="list-style-type: none"> • Gas consumption = 72.97 tCO₂e • Owned cars = 23.71 tCO₂e
Scope 2	<ul style="list-style-type: none"> • Purchased Electricity = 260.98 tCO₂e
Scope 3 (included Sources)	<ul style="list-style-type: none"> • Business travel in employee owned vehicles = 9.79 tCO₂e
Total Emissions	367.45 tCO₂e

Emissions reduction targets

The year 2022, is the first year we are reporting and we are implementing a proactive process to capture emissions across all of our scopes to ensure a carbon reduction strategy for our financial year. In order to continue our progress towards achieving Net Zero we have adopted the following carbon reduction targets, listed below:

We project that carbon emissions will decrease over the next five years to 260 tCO₂e, by 2027. This is a reduction of 29%.

We intend to achieve net zero emissions by the end of 2050 and will implement a phased approach, through intermediate targets, to achieve the main objective:

Year	Scope to Net Zero
2030	All operations under direct control
2035	Certain indirect operations (i.e. waste, indirect fuel/energy, employee commuting)
2040	Indirect operations related to the supply chain (purchased goods and services)

Carbon Reduction Projects:

- We are making significant changes and are in the process of getting solar panels installed within the next few months at our factory in Washington.
- Changing the LED/PIR lighting and controls

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published report standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the Board of Directors (or equivalent management body).

Signed on behalf of the Supplier:

PJ Gardner
