

- ◆ **CE MARKED, PURPOSE DESIGNED DEVICE**, designed specifically for paracentesis and other drainage applications thereby avoiding the risks of using inappropriate, 'off-label' devices such as generic suprapubic bladder drains<sup>1</sup>.
- ◆ **SAFETY BLUNT OBTURATOR NEEDLE** minimises risk of accidental perforation of internal structures and reduces sharps risk to users in accordance with COUNCIL DIRECTIVE 2010-32-EU Needlestick Injuries.
- ◆ **SOFT, KINK FREE 8FG PIGTAIL CATHETER** with 1cm catheter markings to aid safer more controlled insertion, improve patient comfort and prevent unnecessary catheter blockage and fracture reported in more rigid, thinner walled materials<sup>1</sup>.
- ◆ **SOFT INTEGRAL SKIN FIXATION PLATE** provides simple, secure fixation after insertion.
- ◆ **WIDE-BORE 3 WAY STOPCOCK** with safety cap for easy flushing and sampling.
- ◆ **SAFETY SCAPEL INCLUDED** to improve ease of insertion and maintain user safety in accordance with the guidance of COUNCIL DIRECTIVE 2010-32-EU Needlestick Injuries
- ◆ **DRAINAGE BAG CONNECTION SET** included as standard to make connection to a wide range of drainage options quick, secure and more cost effective.

## Paracentesis catheter with blunt obturator needle

The Rocket<sup>®</sup> Safety Drain™ offers a purpose designed, cost-effective solution for routine fluid drainage procedures in the department or ward settings where the use of a blunt obturator needle is preferred for enhanced patient and user safety.

### Indications:

For abdominal paracentesis via transcutaneous insertion into the abdominal cavity using a 'direct stab' technique combined with aspiration and/or ultrasound guidance.
