

The Rocket Medical **Hysterocone™ Catheter** combines the features of both traditional cone and HSG catheters into a simple to use device for performing uterine canalisation for hysterosalpingography and hysterosalpingo contrast sonography.

**The Rocket Medical Hysterocone™ Catheter has these features:**

- **MOVEABLE SILICONE CONE** ensures a soft, trauma free seal at the external os.
- **1cm GRADUATIONS** on the distal 7cm to allow the cone to be accurately positioned to match each patient's needs.
- **SMOOTH TIP AND 6FG TUBE** ensures simple, low trauma insertion, ideal for the nulliparous cervix.
- **REMOVABLE HOLLOW STIFFENING TUBE** to aid insertion, and to maintain rigidity during contrast injection.
- **CONTRAST PATH TAP** ensures retention of contrast when further volumes of media are required.
- **COMPATIBLE** with aqueous and oil –based x-ray and ultrasound contrast media.
