

- ◆ **EASIER SAMPLE COLLECTION:** The sampling wand combines blade and capillary tube holders, to facilitate continuous visibility of the sampling site, which can be lost when transferring between separate devices.
- ◆ **SAFER COLLECTION:** The sampling wand features a retractable blade to reduce the potential for needlestick injuries. To retract the blade after use, just press the button on the shaft - it is as easy to use as a ballpoint pen.
- ◆ **MAXIMUM ILLUMINATION AS STANDARD:**
To ensure bright and reliable visualisation, every kit contains the latest **Amnilume™ light source**.
- ◆ **A UNIQUE KIT** for lactate analysis using handheld lactate analysers, which includes capillary tube dispensers, for easy application of the sample to the analyser test strip.

At Rocket Medical we know our customers are our greatest source of new ideas and product improvements.

Our FBS Kits incorporate your user feedback for improved visualisation, easier scalp puncture and sample collection, all combined in a smaller tray to save on packaging and storage space.

CONTENTS:

- Amnioscope and Amnilume™ Light Source
- Sampling wand - combined blade and capillary tube holder
- 5 x 10cm x-ray detectable gauze swabs - green
